Renova Pet Since 2019

Product Brochure

Leading the Future of Tea Cat Litter

Tea Cat Litter

— Full of Polyphenol

The Natural Choice For A Happy Home

Hangzhou Renova Pet Products Co.,Ltd

Founded in 2019, Renova Pet Products Co.,Ltd. is a leading provider of natural plant cat litters and innovative pet care products.

Leveraging our integrated industrial chain and strategic partnerships with renowned universities, we have developed a diverse range of pure natural plant cat litters, including Green Tea, Black Tea, Lemon, Tofu, and Cassava Cat Litter.

These products offer exceptional odor control and a gentle, natural scent.

We Turned Tea Leaves into a Promise
— to Pets, Families, and Our Planet.

02

Factory Overview

11000m²
Area

Fully automated production line

2 cat litter production lines
4 packaging lines

Capacity of production

Daily production of 100 tons of cat litter
Annual production of 40,000 tons of cat litter

6 Items
Production line

Staff

50+ Production employees

10+ Professional engineers

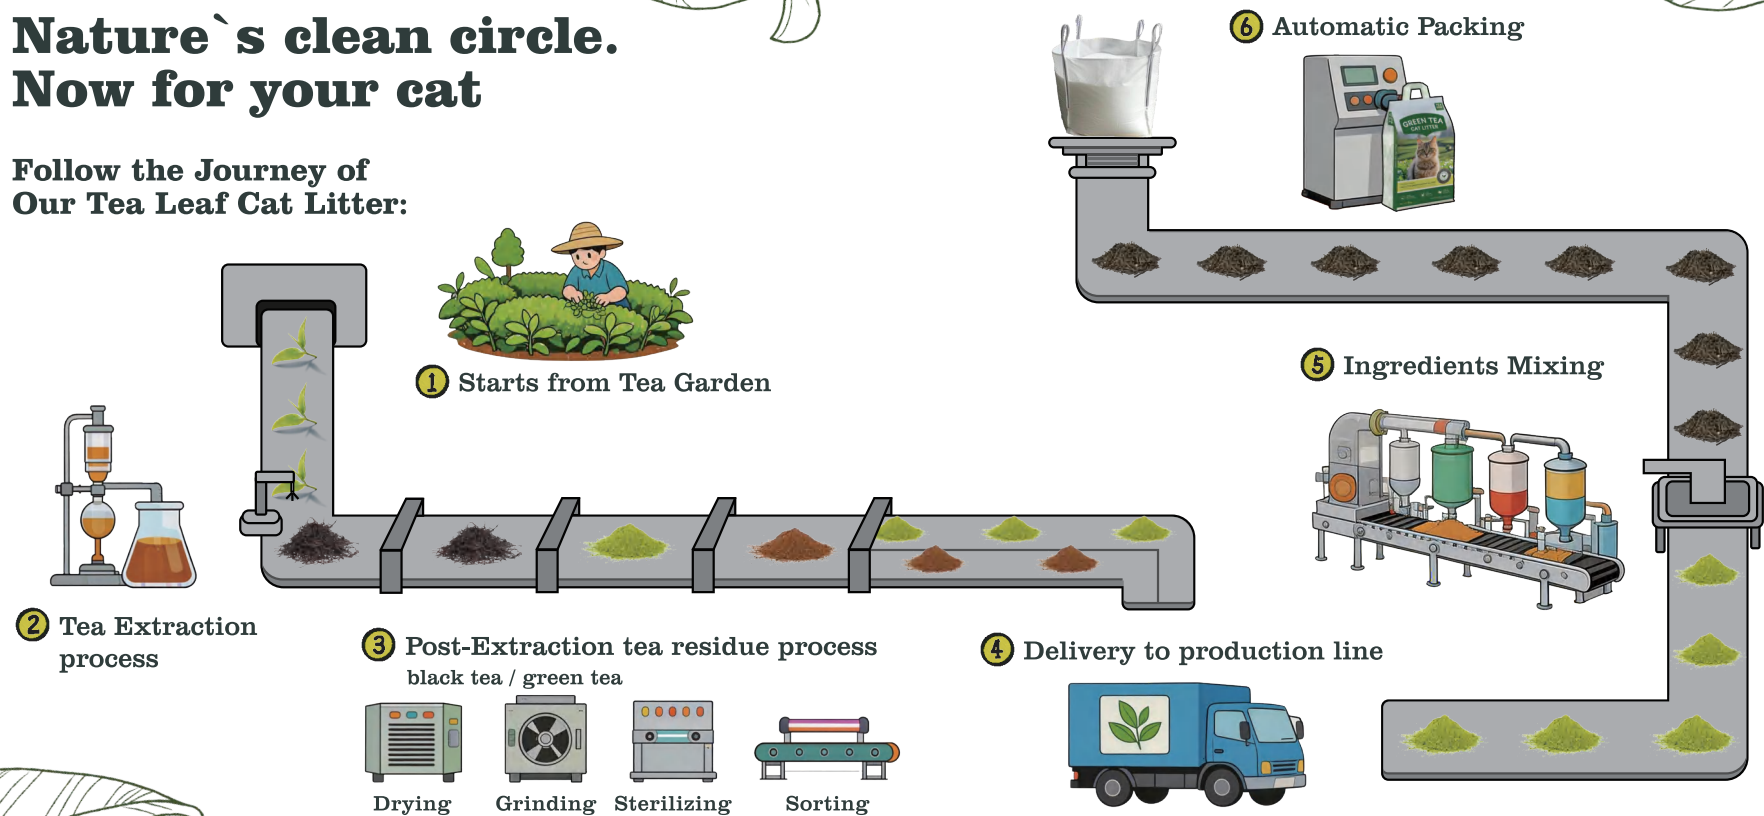

Industry-Leading Production Scale and Technical Expertise.

Winner of the 2024 Shenzhen Pet Fair "Premium Pet Product Brand" Award.

03

Nature`s clean circle. Now for your cat

Follow the Journey of
Our Tea Leaf Cat Litter:

Core Strengths

Raw Materials And Processes

- **Natural Raw Materials**

Carefully selected food-grade ingredients: including tofu residue, tea residue, and starch which ensure a natural composition. With no chemical additives and low dust, our litter safeguards your cat's respiratory health.

- **Innovative Technology**

Our proprietary mixing technology guarantees product consistency. The litter features fast clumping, high absorbency, low stickiness, and easy water solubility, making it versatile for all types of litter boxes.

- **Flushable & Eco-Friendly**

- **Breaks down in toilet**
 - For best results, flush slowly in batches.
- **Low-energy production**
 - Meets national environmental standards.
- **Reduces landfill waste** and supports a circular economy.

Environmental protection concept

Core Advantages

Supply chain and production capacity

- **Source Control**

We operate our own raw material base to ensure consistent, high-quality input.

- **Smart Manufacturing**

Our 2 automated production and 4 packaging lines enable intelligent, end-to-end process control—from mixing to packaging—ensuring efficiency and reliable delivery.

- **Collaborative R&D**

Through our partnership with expert organizations, we maintain an in-house pet product laboratory. This facility allows us to:

- **Continuously optimize** product formulations.
- **Develop targeted varieties** such as odor-neutralizing, scented, and custom-shaped granules.

R&D strength

Quality Control

Total Quality Management Principle

1. Professional quality assurance personnel training
2. Strict quality assurance management system
3. Integrate incoming material management process
4. Regular supplier traceability management
5. Strictly control the quality of raw materials

1

Raw material control

- Professional sensory evaluation
- Testing of important physical and chemical indicators

2

process monitoring

- Full process control
- Traceability
- Environmental monitoring

3

Finished product testing

- Inspection of various indicators
- Testing report
- Traceable to each order and batch, ensuring the quality of each box of products

Research And Development Patents And Certificates

Invention Patent

ISO9001

Our company holds 4 utility model patents and 1 Chinese invention patent, underpinning our technical innovation. We are also certified to key international standards including ISO 9001, SGS, MSDS, REACH, and RoHS, ensuring global compliance. This commitment to quality and standards is why our products are trusted in markets worldwide.

Various Certifications

Our Brands:

For Home Market

For Global Market

Our Philosophy:

Pure / Natural / Responsible

We put the well-being of pets and the health of our planet first. That's why every product is crafted from pure, natural materials. Our commitment is to deliver natural, effective solutions that you can trust for a healthier home and a greener world.

GREEN TEA CAT LITTER

01

Main Ingredients

Green Tea Fiber, Corn Starch, Bean Fiber, Guar.

Product Features

- **Eco-friendly Materials:**

Made from recycled tea waste and plant-based ingredients.

- **Pet-Safe Formula:**

Food-grade and non-toxic, even if accidentally ingested.

- **Natural Odor Control:**

Tea polyphenols and bio-enzymes eliminate odors at the source.

- **Gentle Scent:**

Naturally fragranced with green tea, no synthetic perfumes.

- **Ultimate Convenience:**

Flushable, septic-safe, and dissolves quickly—just scoop and flush.

12

DEODORIZING WITH TEA POLYPHENOLS

02

Source

Tea polyphenols are natural compounds extracted from premium tea leaves (*Camellia sinensis*). Sourced from recycled tea processing residues, these bioactive compounds possess powerful antioxidant, antibacterial, and deodorizing properties while maintaining ecological sustainability.

How It Works

Tea polyphenols act like microscopic odor-binding agents. Their molecular structure adsorbs and helps chemically neutralize ammonia, sulfur-containing compounds, and other malodors at the source, leaving the air truly fresh rather than simply perfumed.

13

BLACK TEA CAT LITTER

03

Main Ingredients

Black Tea Fiber, Corn Starch, Bean Fiber, Guar.

Product Features

- **Eco-friendly Materials:**

Made from recycled tea waste and plant-based ingredients.

- **Pet-Safe Formula:**

Food-grade and non-toxic, even if accidentally ingested.

- **Natural Odor Control:**

Tea polyphenols and bio-enzymes eliminate odors at the source.

- **Gentle Scent:**

Naturally fragranced with black tea, no synthetic perfumes.

- **Ultimate Convenience:**

Flushable, septic-safe, and dissolves quickly—just scoop and flush.

14

DEODORIZING WITH TEA POLYPHENOLS

04

Source

Tea polyphenols are natural compounds extracted from premium tea leaves (*Camellia sinensis*). Sourced from recycled tea processing residues, these bioactive compounds possess powerful antioxidant, antibacterial, and deodorizing properties while maintaining ecological sustainability.

How It Works

Tea polyphenols act like microscopic odor-binding agents. Their molecular structure adsorbs and helps chemically neutralize ammonia, sulfur-containing compounds, and other malodors at the source, leaving the air truly fresh rather than simply perfumed.

15

LEMON CAT LITTER

05

Main Ingredients

Lemon fiber, Bean fiber, Corn starch, Guar.

Product Features

- **Eco-friendly Materials:**
Made from upcycled lemon peel and plant-based ingredients.
- **Pet-Safe Formula:**
Food-grade and non-toxic, even if accidentally ingested.
- **Natural Odor Control:**
Buffered citric acid neutralizes ammonia at source, no harsh masking
- **Gentle Scent:**
Naturally scented with real lemon peel, no synthetic perfumes.
- **Ultimate Convenience:**
Flushable, septic-safe, and dissolves quickly—just scoop and flush.

16

DEODORIZING WITH D-LIMONENE & ENZYMES

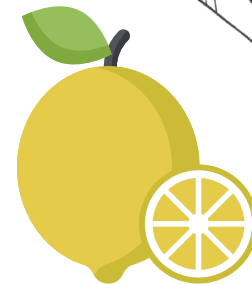

06

Source

Citrus bioactives are natural compounds extracted from lemon peel (Citrus limon). Sourced from upcycled citrus processing residues, these bioactive compounds possess powerful antioxidant, antibacterial and deodorizing properties while maintaining ecological sustainability.

How It Works

Lemon-derived compounds act like microscopic odor-binding agents. Their molecular structure adsorbs and helps chemically neutralize ammonia, sulfur-containing compounds, and other malodors at the source, leaving the air truly fresh rather than simply perfumed.

17

TOFU CAT LITTER

07

Main Ingredients

Pea Fiber, Corn Starch, Guar Gum.

Product Features

- **Eco-friendly Materials:**

Made from edible-grade tofu residue and pure plant fibers. Zero waste, fully biodegradable.

- **Pet-Safe Formula:**

Food-grade soy protein. Fully digestible and non-toxic if ingested.

- **Natural Odor Control:**

Porous Pea Fiber. Physically adsorbs ammonia and locks in moisture instantly.

- **Pure & Gentle:**

100% Unscented. Contains no added perfumes or synthetic fragrances. Ideal for cats (and humans) sensitive to smells.

18

TOFU FIBER TECHNOLOGY

08

Source

Tofu fiber is derived from non-GMO soybean processing by-products. This food-grade material is sterilized, dried, and finely textured to create a highly absorbent, natural litter base that is both sustainable and safe for cats and the environment.

How It Works

Tofu fiber contains natural porous structures that act like microscopic sponges, rapidly absorbing moisture and trapping odor molecules. Upon contact with liquid, the fiber expands and forms a solid, scoopable clump that locks in odors and moisture, making cleanup effortless and hygienic.

19

CASSAVA CAT LITTER

09

Main Ingredients

Cassava Starch, Corn Starch, Guar Gum.

Product Features

- **Rock-Hard Clumps:**
Instant solidification prevents leakage and sticking.
- **Dust-Free:**
Heavy granules ensure a clean, breathable environment.
- **Unscented:**
No perfumes. Safe for sensitive cats and humans.
- **Plant-Based:**
Biodegradable and made from renewable cassava roots.
- **Ultra-Low Usage:**
High density requires less litter per change, saving money.

20

CASSAVA STARCH TECHNOLOGY

10

Source

Cassava starch is extracted from the roots of sustainably farmed cassava plants. This renewable, non-GMO resource is processed into a fine, highly absorbent material that offers a strong, natural alternative to clay and silica litters.

How It Works

Cassava starch expands upon contact with moisture, forming a tight, solid clump that locks in liquid and odor. Its natural molecular structure creates a barrier against ammonia, while remaining soft under paw and safe for cats and the environment.
